

Continuous Flow 2-Component Meter-Mix-Dispense System

See-Flo 7 System with Mix-Dispense Valve

- ▶ Precise volumetric metering of low to medium viscosity materials
- ▶ Continuously dispense extruded beads or precise volumetric “shots” of mixed material
- ▶ Economical air powered drive
- ▶ Variable ratio capability
- ▶ Adjustable dispense flow rate control
- ▶ Heavy duty industrial frame
- ▶ No reload time: Meter design provides a continuous flow of mixed material
- ▶ Available accessories:
 - Program-A-Shot® volume control
 - Stainless Steel wetted components
 - High Viscosity material models
 - 4” or 6” air motor drives
- ▶ Program-A-Shot: Electronically store and quickly recall up to 233 shot volumes

Features

Whether your dispense application requires operator or machine controlled dispense, a manually controlled bead or a preset ‘shot’ volume of mixed material, the See-Flo 7 provides the ability to accomplish the task.

The See-Flo 7’s versatile precision is adaptable to a wide variety of meter/mix/dispense applications including self contained mobile units.

The See-Flo 7 ruggedness provides many years of reliable and dependable metering.

Applications

- Bonding
- Potting
- Molding
- Filling
- Extruded bead
- Product assembly

See-Flo 7 Meter-Mix-Dispense System

Variable Ratio Meter

Adjusting the ratio is simple. *SEE-FLO 7* models are available to proportion volumetric mix ratio's from 1:1 up to 20:1.

For fixed ratio model select See-Flo 582

Shot Control Accessories

Three shot control designs are available and each shot size control is easily adjusted.

- Program-A-Shot electronic control
- Limit Switch shot volume control
- Timed Shot volume control

The shot size range is dependant on the metering pumps selected.

See-Flo 7 System with Program-A-Shot® Electronic Volume Control

Automatic Dispense Valve with No-Flush Disposable Mixer

Manual Handle with Boom and Tool Balancer Accessory

Available Accessories

Electronic Volume Control

Program-A-Shot® permits you to electronically store and recall 233 different 'shot' volumes.

Manual Shot Control

Control the volume of mixed material dispensed using limit switch or timer controls.

Material Supply

Pressure vacuum tanks(2 - 60 gallons), 55 gallon drum racks with transfer pumps, 5 & 55 gallon drum pump assemblies, with or without agitators, are available to suit your production requirements.

Other Accessories

- Cart mounting for portability
- Boom assemblies with tool balance for Valve
- Manual Valve Handle with trigger actuator
